#### ADMINISTRATIVE DECISION (316) 2012 ON THE CONTROL OF READY MIX CONCRETE PLANTS AND CENTRAL BATCHING UNITS IN THE EMIRATE OF DUBAI

The Director General of Dubai Municipality, after perusal of

- the authorities legally conferred on us under the Establishing Decree of Dubai Municipality,
- the Local Order (3) 1999 on organizing the construction works in the Emirate of Dubai,
- the Administrative Order (143) 1991 on controlling the use of sand in concrete produced in ready mix concrete plants and central batching unit at work sites,

do hereby decide the following:

Article (1):	The following definitions are used for words and statements as mentioned	
	unless other definitions are given thru the text:	

	5	
The Emirate:	The Emirate of Dubai	
Municipality:	Dubai Municipality	
Ready mix concrete:	ready mix concrete produced in the ready mix factories and delivered to construction sites, or produced in central batching unit in the construction site, or produced in precast concrete plants.	
Factories:	licensed factories in Emirate under the activity of manufacturing ready mix concrete.	
Central batching units:	ready mix concrete units that are licensed to operate in the construction sites in addition to those operated in precast plants.	
Conformity Certificate:	Document issued by Dubai Central Laboratory Department in the Municipality, to factories and central batching units, attesting their compliance with the approved standard specifications.	
Conformity Mark:	Approved mark issued by Dubai Central Laboratory to factories and central batching units which obtain the conformity certificate.	
Approved standard specification: the standard specification approved by Dubai Municipality.		
Register:	the prepared register by Building Department in the Municipality in coordination with Dubai Central Laboratory to register factories and central batching units that are certified to use the conformity	

Article (2): It is not allowed to use ready mix concrete in construction sites within the Emirate unless it is produced in factories and central batching units that are licensed in the Emirate and certified to use the Conformity Mark from Dubai

mark.

Central Laboratory.

Article (3): In implementation of the provisions of this decision, Dubai Central Laboratory and Building Departments in the Municipality shall be responsible for the following:-

(For legal matters, please refer to the original Arabic document)

#### First: Dubai Central Laboratory Department:-

- 1. prepare, approve and update the standard specification for ready mix concrete in coordination with Building Department.
- 2. establish scheme for issuance of Certificate/Conformity Mark for factories and central batching unit in accordance with the followed international best practices and the requirements of the approved standard specifications and carrying out all related assessment procedures for that purpose.
- 3. generate the specific and general rules and special requirements of the scheme for issuance of the Certificate/Conformity Mark for factories and central batching units, and the rules for suspension, withdrawal and cancellation of the license.
- 4. prepare the guidelines and specific forms that clarify the conditions and provisions required for obtaining the Certificate/Conformity Mark for factories and central batching units, in addition to all details that shall appear in the conformity certificate and the shape and design of the conformity mark.
- 5. issuance of the Certificate/Conformity Mark for factories and central batching units that are assessed in accordance with the requirement of the certification processes and the approved standard specifications.
- 6. establish the list of factories and central batching units that are certified to use the Certificate/Conformity Mark.
- 7. carrying periodic surveillance on factories and central batching units to ensure their consistent compliance with the conditions of issuance of the Certificate/Conformity Mark and the requirements of the approved standard specifications.
- 8. suspend, withdraw, cancel the Certificate/Conformity Mark of any of the factories or central batching units that violate the conditions and provisions required for obtaining the Certificate/Conformity Mark, in coordination with Building Department.

#### Second: Building Department:-

- 1. establish and manage the register of factories and central batching units that obtain the Certificate/Conformity Mark, in coordination of Dubai Central Laboratory Department.
- 2. issue the permission to supply ready mix concrete or precast concrete elements to the construction sites and the permission to use the ready mix concrete produced by the central batching units in their sites.
- 3. issue and circulate the rules, instructions and guidelines, that will ensure maintaining the quality of the ready mix concrete and precast elements, in addition to the guidelines for contractors and consultants offices including the lists of factories that obtain the Certificate/Conformity Mark.
- 4. issue the procedures and instruction that must be followed before the start of executing the pouring of the ready mix concrete in the construction site, in line with the requirements of the approved standard specifications.

(For legal matters, please refer to the original Arabic document)

- 5. verify that the ready mix concrete supplied to construction sites; either from the factories or produced in central batching units, is complying with the approved standard specification, and supplied only from factories and central batching units which are certified to use the Certificate/Conformity Mark.
- Article(4): All ready mix factories and central batching units shall obtain the Certificate/Conformity Mark from Dubai Central Laboratory Department in the Municipality, before start supplying their products of ready mix concrete to the construction sites, these products shall not be considered complying to the approved standard specification and shall not permitted to be supplied until the factories and central batching units have valid Certificate/Conformity Mark.
- Article(5): For the purpose of article (4) of this decision, Dubai Central Laboratory Department shall issue Certificate/Conformity Mark after satisfactory completion of assessment process of the factory as per the requirements and procedures of the Conformity Mark certification scheme and required tests and compliance of the ready mix concrete with the approved standard specifications.
- Article(6): Only factories and central batching units that are certified to use the Conformity Mark shall appear in the register. The registration validity shall be one year, during which the factory and central batching unit shall apply for another one year renewal before (30) days form the expiration date of their registration.
- Article(7): Factories and central batching that are certified to use the Conformity Mark shall be responsible for the following:-
  - 1. comply with the conditions and requirements of the Conformity Mark certification scheme and the approved standard specification.
  - 2. inform Dubai Central Laboratory Department on any changes or modifications of their activities or followed operational and work procedures.
  - 3. provide all necessary facilities and free access for the employees of Dubai Central Laboratory Department while carrying out their assessment duties and regular follow ups and monitoring.
  - 4. central batching units shall comply with their assigned licensed location and time frame, they shall not supply their ready mix concrete to other construction sites where they are not originally licensed.
- Article(8): Contractors and consultants offices shall not use the ready mix concrete supplied from factories or produced in central batching units unless it is accompanied with Certificate/Conformity Mark, and supplied only form registered factories and central batching units. Building Department in the Municipality shall conduct regular inspections and monitoring on construction sites to verify that the used ready mix concrete supplied from either factories or central batching units is complying with the approved standard specification, subject to the implementation of penalties prescribed in

(For legal matters, please refer to the original Arabic document)

Local Order (3) 1999 on organizing the construction works with the Emirate of Dubai.

- Article(9): Administrative Order (298) 1990 and Administrative Order (143) 1991 which are referred to in this decision shall be cancelled, moreover any text stated in any other related Administrative Decision shall be cancelled to the extent in which they are in conflict with the provisions of this decision.
- Article(10): The directors of Dubai Central Laboratory and Building Departments shall issue the required instructions to implement the provisions of this decision after coordination and consultation between each other.
- **Article(11):** This decision shall be implemented from the date of issuance.
